8	6	4
9	5	2
7	1	3

180

3.

1	3	8
7	6	2
4	5	9

42

4.

7	3	2
1	4	8
9	6	5

100

5.

4	9	5
7	3	5
0	2	4

108

6.

2	7	5
9	9	9
6	3	8

24

7.

2	4	6
0	2	8
2	7	9

72

8.

7	8	2
6	4	3
9	4	1

162

9.

6	3	7
2	6	4
8	9	8

Game 29**Place Value Elimination**

Number of Players: 1

Concept: practicing place value and number sense

Materials: markers (coins, beans, buttons, etc.)

Directions: Read each clue. Put a marker on the numbers that fit each clue. After answering all of the clues, there will be one number left. (**Note:** Some numbers may be used more than once.)

704	708,345	990,851	251
1,234	9,045	7,006	5,678
19,640	13,686	100,000	34,120

Clues

- When my digits are added together, the total is a number between 20 and 33.
- There is a 4 in the ones place in my number.
- My number is an odd number.
- All of my digits added up equal 1.
- I have a 3 in my ten-thousands place.
- Which number is left?
- Write a clue for this final number.
