Title/Skill: From Liquid to Gas
Grade: 4 **Subject:** Science
Topic: States of Matter **Unit:** 2

Summary:
 Students observe the changes in the physical states of matter using water as an example.

Objectives:
 Students will observe how water (liquid state) changes into vapor (gaseous state) in the presence of heat.

Procedures:
 Materials: hot plate; dark food coloring; 1-ounce (30 mL) cups filled with water; heat-proof clear glass container; large candy thermometer; permanent black marker; What Happened to the Water? Data Sheet

Assignments | Add Assignment

- Turn in "From a liquid to a gas" lab assignment
 Due 2 days after lesson
 Students perform follow-up experiment (From Gas to Liquid), using information from this activity to predict outcome of experiment.

Putting it all together...

Each class you teach will have its own class calendar. All you have to do is put your lesson on one of the dates of your class calendars and your assignments will automatically appear as well. You can then print your class calendars for easy reporting!
