Going to the Clinic

These are new words to practice.
Say each word 10 times.

* clinic

* cotton

* lab

* records

* waste

* shot

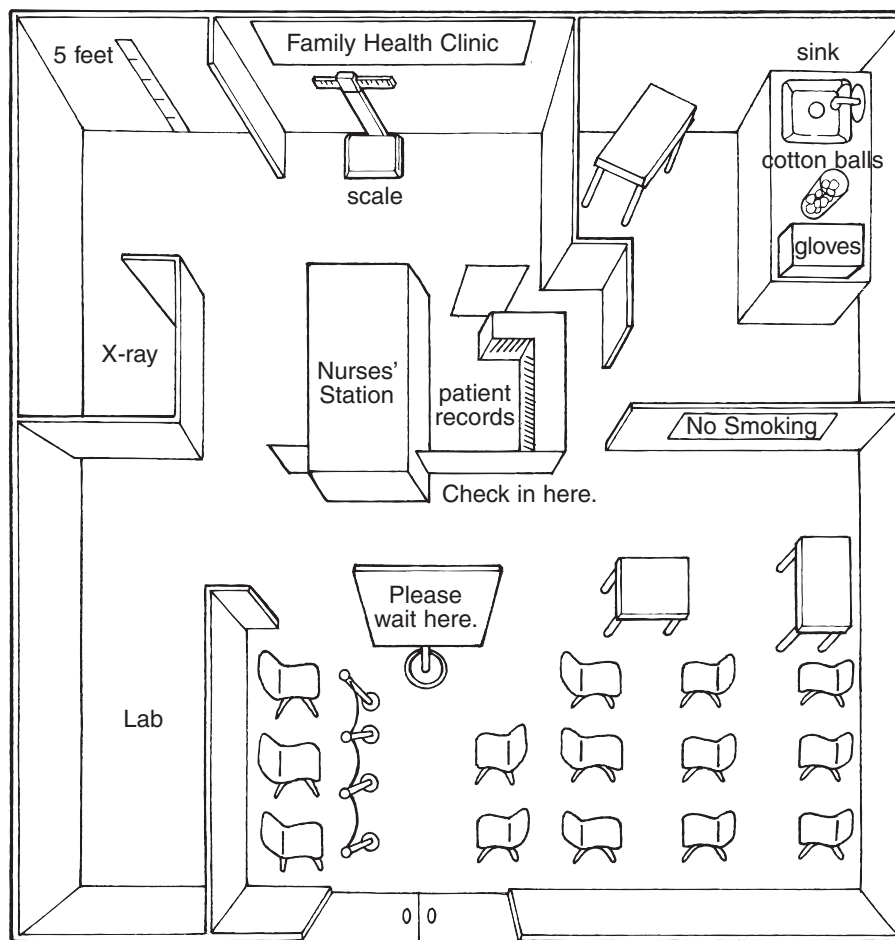

* scale

* wait

Choose one new word to write.

Going to the Clinic

Garrett went to the family health clinic. He got his hand caught in the car door. His mom wants to see if it is broken.

Garrett sat and waited. A nurse called his name. Garrett's mom walked with him.

The nurse checked Garrett's height and weight. He stood next to a wall chart. The nurse measured him. Then Garrett stood on the scale. The nurse made notes on his chart.

She took him to a room. Garrett sat on a table. He saw cotton balls and gloves on the counter next to the sink. The nurses and doctors use those things.

The doctor came in. He checked Garrett's hand. He didn't think it was broken. He told Garrett to have an X-ray to make sure.

The nurse took Garrett to the X-ray room. They took a picture of the bones in Garrett's hand. His hand looked okay.

Garrett could leave. He didn't need a cast on his hand. He didn't want to come back to the clinic for a while.
