

Chapter 1

A Black and White Beauty

No animal in the world is more instantly recognizable than the giant panda bear. Contrasting colors make giant pandas stand out in the animal kingdom. Pandas look, eat, and act like no other animal on Earth, and they have nearly disappeared from our planet.

Giant pandas >> are comfortable on the ground, but are capable of climbing trees to find food or a place to sleep.

Giant pandas look like massive teddy bears. They have big, fuzzy heads and white fur with black patches on their ears and eyes. Their legs and shoulders are also black.
